

In today's society a telephone line is a precious resource. It provides among other things a measure of safety by connecting us with the outside resources we need in an emergency. as such it is a necessity. It is also in our private domain; and what comes in to that domain should be our choice, not anyone else's. It is after all our private property. Please keep the "Do Not Call List" Law intact exactly as it is! It's our right not to be disturbed.
